SOFTWARE DEVELOPMENT

Software Engineer focused on building scalable full-stack applications and AI-powered systems. Experienced with TypeScript, JavaScript, PHP, C++, Python, Next.js, NestJS, PostgreSQL, Redis, and cloud technologies, with strong foundations in data structures and algorithms. Hands-on experience building LLM-powered applications, RAG pipelines, vector search systems, and agentic AI workflows. Interested in software engineering, Generative AI, distributed systems, and building reliable products that solve real-world problems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, C++

Frontend: React.js, Next.js, Tailwind CSS, SEO, HTML, Bootstrap

Backend: Node.js, NestJS, Express.js, FastAPI, PHP

Databases: PostgreSQL, MongoDB, Redis, Vector DB, QDRANT, Pinecone

Tools: Git/GitHub, Docker, AWS / GCP, Linux / SSH

AI: OpenAI, RAG, Vector Embeddings, Vertex AI, Langgraph, Langchain

EXPERIENCE

BRNDFY (December 2025 - June 2026)

Software Engineer Intern

- Owned end-to-end feature development, from product implementation and UI/UX to backend APIs and deployment.
- Designed and maintained the full infrastructure and CI/CD pipeline, enabling reliable development and production deployments.
- Built and supported systems handling 10K+ users across events/hackathons and the broader LifeSkill/Oppskills platform.

Shiv Aadi Real Associate (June 2026 - August 2026)

Product Engineer Intern

- Maintained the company's digital presence, including the website and ongoing product/content updates.
- Managed client communication and lead management, helping organize incoming inquiries and maintain the customer pipeline.
- Supported the company's online operations by connecting website-generated leads with the appropriate client/business workflows.

PROJECTS

Oppskills (Feb 2025 - June 2026)

Founding Engineer

- Built a 10K+ user opportunity platform with Next.js, NestJS, PostgreSQL, and Redis.
- Designed REST APIs, authentication, database schemas, and core system architecture.
- Used Redis caching, BullMQ, and async jobs to reduce database load and improve scalability.
- Implemented rate limiting, query optimization, and indexing for reliable API performance.

ShopAgent

- Built **ShopAgent**, a SaaS layer that lets any e-commerce merchant plug in an AI shopping agent (conversational search, order history/status, purchase) using their existing product, customer, and order APIs
- Implemented the payments layer: collects customer payments into a central Razorpay account via the Razorpay API and disburses funds to each merchant's account on request, avoiding merchant-side API key sharing
- Validated the system end-to-end by integrating ShopAgent into an existing food-ordering site, handling real orders and inventory rather than mocked data

Ponion (October 2025 - Jan 2026)

- Built a multi-tenant restaurant marketplace with Next.js, Node.js, and MongoDB for discovery, menus, and online ordering.
- Designed role-based access control (RBAC) and REST APIs for customers, restaurant owners, and platform administrators.
- Developed restaurant management and Super Admin dashboards for menu management, onboarding, verification, and platform operations.
- Owned database design, backend architecture, frontend development, deployment, and production maintenance.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) in CSE - 2028

Majors: Computer Science and Engineering — Galgotias College of Engineering and Technology

- Machine Learning Operations (MLOps) for GenAI @ Google
- (MLOps) with Vertex AI: Model Evaluation @ Google

EXTRACURRICULAR ACTIVITIES

Director, Technical Services

Rotaract Club of Galgotias Educational Institutes

Web Development Workshop Facilitator

- Conducted hands-on workshops for junior students on web development fundamentals and modern technologies, fostering practical learning and technical growth.

LEADERSHIP & ACHIEVEMENT

- Director, Rotaract Club, GCET — Led technical initiatives, teams, and project execution across college activities.
- Conducted Web Development workshops, mentoring students and volunteers on modern development technologies.
- Led hackathon teams through ideation, architecture, task delegation, and project execution.
